2007 ANNUAL APPEAL

2006 First Night and The Park Street Church
Photo by Dick Taffe

Illuminating our City's Unique History and Culture Boston's Diamond Necklace

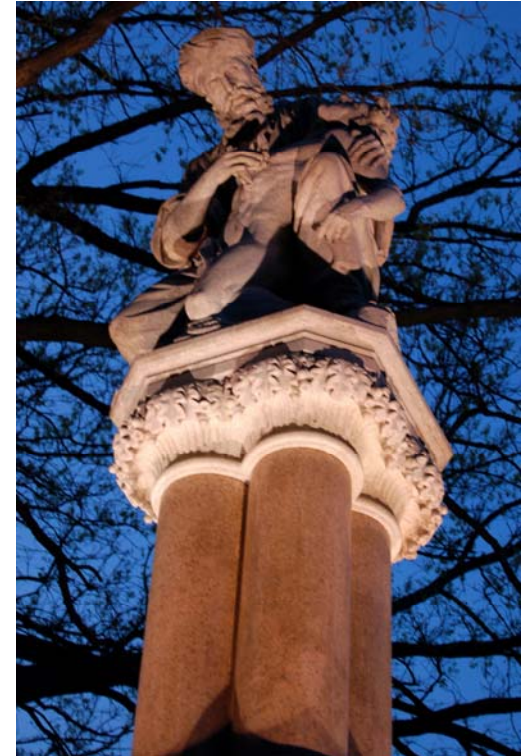

Light Boston is pleased to report completion of the Chinatown Gateway which involved placement and installation of all light fixtures on the gateway itself. The George P. Henderson Foundation and the Edward Ingersoll Browne Fund made this project possible through two generous grants. John Powell of Light Time in Space was the lighting designer. Dear Friend of Light Boston

As we complete our tenth year at Light Boston, our organization remains as vital as ever. With planning initiatives in the Mission Hill and Fort Point Channel neighborhoods, as well as a city wide planning initiative in the discussion phase at the Boston Redevelopment Authority, our advocacy role takes many shapes, but always focuses on improving the quality of life in our wonderful City. Inspired by the comprehensive exterior lighting efforts of a number of international cities, we hope over time to instill that mindset here. To that end, we work to make the night time environment both a cause for celebration and an opportunity to extend the daytime vibrancy of our City. Whether we are talking about reducing glare in Mission Hill, illuminating our historical and cultural treasures or starting an artistic, exterior lighting competition, Light Boston believes the cumulative effect of its efforts will make Boston a better place to live and enjoy.

We hope you will consider joining us in our efforts with a contribution to our 2007 Annual Appeal. Together, let's continue to add luster to Boston's *Diamond Necklace*.

In 2006, the Ether Monument in the Public Gardens received new lighting paid for by the City and money from private donors including the Solomon Fund and the Friends of the Public Garden. Photo (C) 2007 Ornoth D.A. Liscomb
